

# SEISMICS and the City

18 MARCH 2016  
CHRISTCHURCH NEW ZEALAND

## Shaping Canterbury's Future Now - Collaboration, Regeneration & Innovation

"From my perspective, Regenerate Christchurch must and will engage with the community around what will be done."

André Lovatt, Chair, Regenerate Christchurch

[Seismics and the City 2016](#) will be held on Friday 18 March at Rydges Latimer in Christchurch. The theme is **Shaping Canterbury's Future Now - Collaboration, Regeneration & Innovation**.

The forum is the fifth in a unique cross-sector series involving representatives of public, private and community sector organisations and interested individuals sharing their visions and voicing their concerns and solutions for creating a vibrant, 21st century city in a prosperous region.

It is also an opportunity to look back and reflect on the lessons of the last five years and to look forward and be part of the early engagement with the new post-quakes entities Regenerate Christchurch and Otakaro Limited. [View All Contributors](#)

### Milestones and Millstones

The forum will celebrate several milestones in the post-quake recovery and regeneration of Greater Christchurch while not ignoring some millstones still dragging some people down.

[View Programme](#)

It will also mark a shift in focus to the pursuit of local and global opportunities based on collaboration and innovation across the Canterbury region. Business growth, initially based on post quakes recovery and fuelled by insurance payouts, has now developed a momentum of its own. [View Registration Options](#)

It features inspiring case studies of new ways of working and innovative new products and services and gives organisations the opportunity to have their voices heard. It is also a vehicle for high level business relationship building.
